

Found a bug?

- First of all, make a screenshot.
 - Reproduce it.
 - Make sure that such bug-report does not exist already.
 - Make sure that you found a bug in a “right” environment.
 - Minimize a quantity of steps to reproduce a bug (find a shortest way).
 - REPORT IT ASAP!
-

How to write an ideal bug-report:

Bug-report is not a poem. Use a simple technical english to describe a defect.

3W rule:

- **W**hat happened?
- **W**here it happened?
- **W**hich circumstances?

The difference between actual and expected results should be clear.

One bug - one bug-report.

Example:

Summary: Error message does not appear if submit empty Email field on the Login form.

Steps to reproduce:

1. Open the app.
2. Specify password.
3. Click “Login” button.

Actual result: Nothing happens

Expected result: Error message appears “Specify email and password”.

Re-verification comment template:

Re-verification:

STR:

- 1.
- 2.
- 3.

Expected result:

Actual Result:

Bug is not reproduced. Closed. / Bug is reproduced. Re-opened. Please, fix.
